

# Space for Innovation and Collaboration in Technology Businesses

# PUSAT INKUBATOR BISNIS TEKNOLOGI UNIVERSITAS NEGERI SURABAYA

**Technology-Business Incubator Center State University of Surabaya (PIBT UNESA)** is a strategic platform designed to support the growth and development of innovation and technology-based startups. As a collaborative space, PIBT UNESA provides a conducive ecosystem for innovators, researchers, and young entrepreneurs to develop ideas, refine products, and develop competitive business models.

Through structured mentoring, supporting facilities, and networking with academics, industry, and strategic partners, PIBT UNESA serves as a bridge between research findings and market needs. This incubation space serves not only as a workplace but also as a learning, networking, and growth platform for startups, enabling them to transform into sustainable businesses that deliver tangible impact on society.

## On January 7, 2026 Unesa Welcomes a Visit from the Minister of Higher Education, Science, and Culture of Timor-Leste

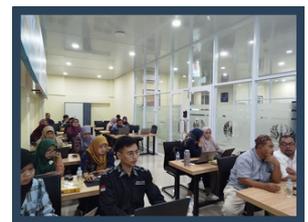

Surabaya State University, including PIBT UNESA, was one of the host destinations for the visit, a strategic opportunity to open up international collaboration opportunities.

This meeting affirmed a shared commitment to developing education, research, and innovation that orients toward real solutions and impacts society, while also encouraging sustainable innovation to improve the quality of human resources at the regional level.

## On January 8, 2026 Hiliriset Research Proposal Coaching Clinic: Synergy and Industry Invitation

This activity serves as a preparation effort for lecturers and researchers in compiling and strengthening Hiliriset proposals, organized by the Ministry of Higher Education, Science, and Technology (Kemendiklitesintek).

Participants are provided with strategic understanding, substantial input, and intensive discussions to ensure their proposals are high quality, aligned with industry needs, and have a high chance of being accepted and receiving funding.

**Surabaya State University hopes that this activity will encourage the birth of more quality, competitive downstream research proposals and will successfully obtain funding under the Hiliriset scheme in the near future.**

JANUARY 2026

## Educational Student Madrasah Visit to Technology-Business Incubator Center State University of Surabaya

Surabaya State University (UNESA) received an educational visit from two Islamic schools at the end of January 2026 as part of an effort to introduce the world of higher education and strengthen students' academic insight.

### On January 23, 2025

MA DAFI Sidoarjo had the opportunity to visit the campus environment of Surabaya State University (UNESA) to get to know more closely the learning facilities, academic atmosphere, and various opportunities for self-development at the university, especially through the UNESA Business and Technology Incubator Center (PIBT). During this visit, students were introduced to various innovative products, prototypes, and research downstream results developed by the UNESA academic community as a form of application of science and technology that has a real impact on society.

### On January 26, 2025

A similar activity was held again with MA Masyhadiyah Giri, featuring a campus exploration session, interactive discussions, and an explanation of the role of PIBT in guiding creative ideas into innovative solutions with entrepreneurial value. Through this activity, UNESA reaffirmed its commitment as an educational and inclusive campus, fostering a spirit of innovation, entrepreneurship, and preparing the younger generation to face future challenges based on research and technology.

This educational visit is expected to not only broaden students' horizons about higher education but also serve as a source of inspiration and motivation to innovate and develop their potential from an early age. Through the strategic role of the Business and Technology Incubator Center (PIBT), UNESA continues to create spaces for collaboration and learning that encourage the emergence of a creative, adaptive young generation ready to contribute to the development of sustainable research-based innovation.
